

Case Study

RS76 | Vilnius

Project: Pilies Street, Vilnius, Lithuania
Product: RS76 sockets

RS76 | Vilnius...

2018 saw the further roll-out of IPL group's RS76 sockets and Glyde bollards in street upgrades in Vilnius Lithuania. On Pilies street in the centre of Vilnius Old Town, the bollards mark the start of the pedestrianised area known for its historic buildings, cafes and market stalls. The bollards are locked into RETENTION SYSTEM™ sockets and can be removed for access and maintenance without the expense of disruptive excavations. This is a cost-effective and long-term sustainable foundation solution and replaces the need and handling of unsightly pedestrian barriers.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com
