

rs Vertical Levelling Pole (VLP) ensuring correct socket installation...

Easy to use Vertical Leveling Pole

Ensures correct socket installation

Available for all sizes of RS sockets

Instructions for use;

1. Remove pedestrian plug & side chamber lid
2. Insert VLP and tighten retaining bolts
3. Replace side chamber lid
4. Pour concrete C30/37 into foundation
5. Vibrate concrete to remove air pockets
6. Check level in two directions on the VLP
7. Allow concrete to partially set, then recheck
8. Remove VLP once concrete has cured
9. Clean off any concrete splatters from VLP
10. Return VLP to storage

NEVER level from the top surface of the socket
or use ducting in place of VLP
