

Delineator

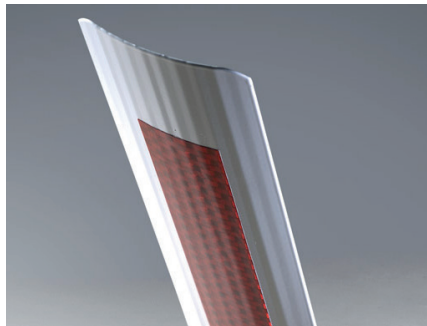

Description:

Steel-Flex is the best selling delineator in the world, renowned for its toughness, durability and ease of installation. Proven on every continent the benefits are now available in the UK.

Made entirely from specially tempered steel, galvanized and polyester powder coated to suit the local regulations. Steel-Flex is designed to out-last other solutions. Being made from steel it is tough. It will not shatter or embrittle. It will not be affected by UV, cold or heat.

Benefits:

- High impact resistance
- Returns to vertical every time
- Low maintenance
- Heat resistant +80°
- Cold resistant -60°
- Will last many years longer than plastic or fibreglass composite
- Can be impacted both ways
- Will not fade or discolour
- Recyclable
- Ground retention barbs
- Will not dislodge on impact
- Fire resistant
- Huge cost savings

Installation:

Steel-Flex requires only one person to install as there is no digging or boring required. The Posts can be driveable in all road shoulders. Depth markers show how far to enter the earth and show ideal vertical positioning. Removal holes aid retraction when required. A surface mounted version is also available for bolt down applications.

Steel-Flex has established itself as a reliable and robust delineator in the harsh weather conditions, with extensive installations in many parts of the world. Impacts and “wing overs” are absorbed with ease as the Steel-Flex is designed and engineered to be resilient and resistant to this kind of punishment.

From temperate climates to the worst weather conditions, Steel-Flex provides optimum performance and cost savings to the end user.
