

# Case Study

## RS115 | Caroline Street

**Project:** X-Last flexible bollards, Caroline Street, Cork, Ireland

**Product:** RS115 sockets

### RS115 | Caroline Street...

RS sockets are used throughout Cork city to ensure street furniture can be easily maintained and damaged posts replaced without any further excavation. In 2010, IPL group supplied X-Last flexible bollards for installation in the existing RS115 sockets along Caroline Street to replace damaged stainless steel bollards. These flexible polymer bollards are extremely durable, they are designed to bend under vehicle impact without damaging the bollard or vehicle and will return to their original shape. X-Last bollards also come in a range of styles and finishes to suit all street designs.

Further information on the RETENTION SYSTEM sockets for post installation is available at [www.retention-system.com](http://www.retention-system.com). Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © March 2011.
