

Case Study

RS115 | Central London

Project: CCTV, Central London, England

Product: RS115df sockets

RS115 | Central London...

TfL (Transport for London) rely on CCTV camera systems in Central London to monitor and keep London's roads free from congestion and incidents. In agreement with CCTV maintenance contractor Tyco, 98.5% of all system equipment including CCTV cameras must be in working order all of the time. The installation of essential infrastructure and CCTV posts in RETENTION SYSTEM™ sockets ensures a quick and reliable maintenance programme. Damaged posts are easily replaced without excavation and with minimum disruption to the public and help TfL meet their high targets of safer streets and smooth traffic flows across London.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate.
