

Case Study

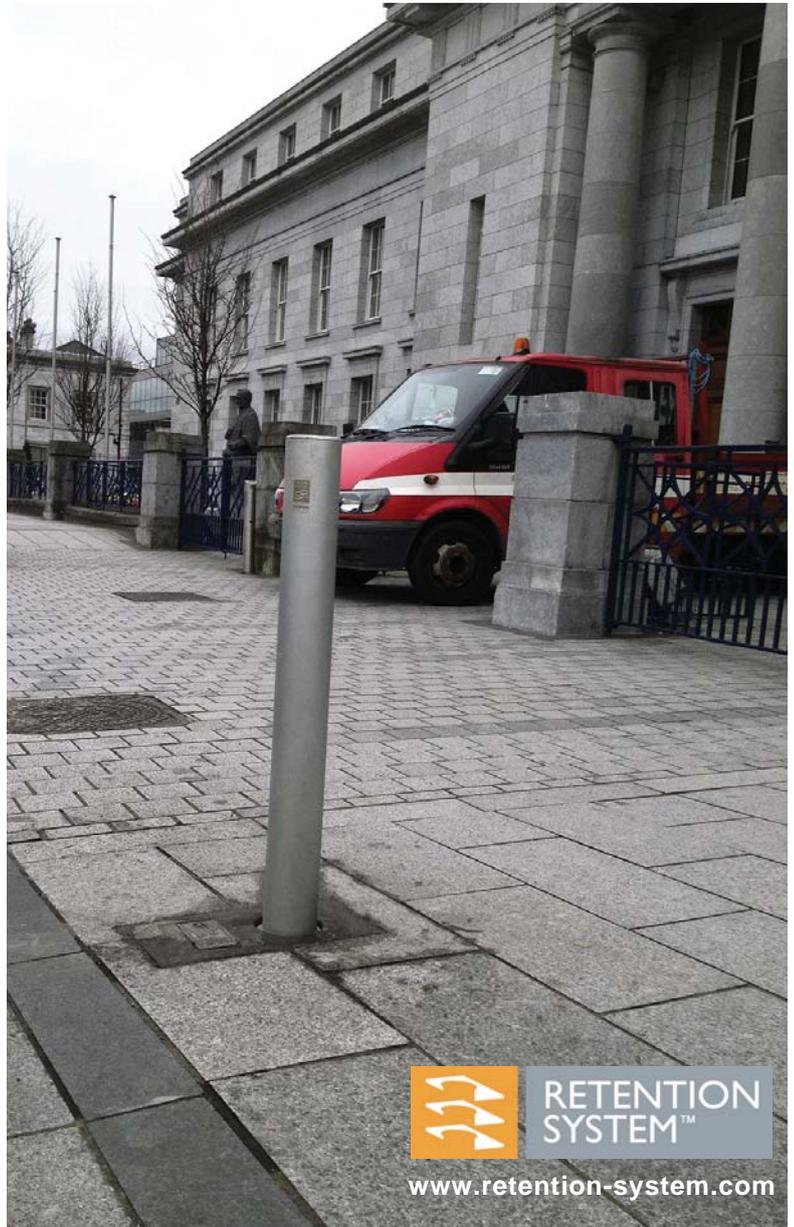

RS115 | Cork City Hall

Project: Bollards, Cork City Hall, Cork, Ireland
Product: RS115 sockets

RS115 | Cork City Hall...

IPL group's RS socket foundations are used around Cork City Hall and throughout Cork city to install street furniture and ensure the easy maintenance of damaged posts without repeat disruptive and costly excavation. Typically in cities, bollards used for parking control or pedestrian safety are located in high traffic areas and require regular maintenance and replacement due to vehicle damage. Alongside RETENTION SYSTEM™ sockets IPL group have introduced X-Last flexible bollards for improved sustainable infrastructure design. These flexible polymer bollards are extremely durable, they are designed to bend under vehicle impact and return to their original shape. X-Last bollards also come in a range of styles and finishes to suit all street designs.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © March 2012.
