

# Case Study

## RS115 | East Wall Road

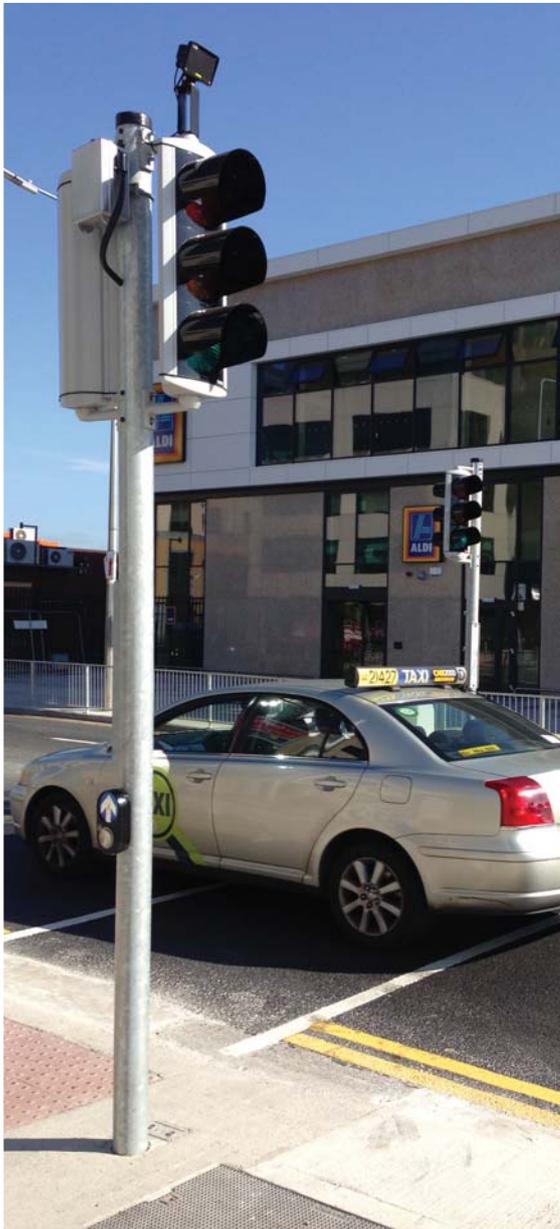

**Project:** Traffic Signals, East Wall Road, Dublin, Ireland

**Product:** RS115df sockets

### RS115 | East Wall Road...

RS115df sockets were used for the installation of traffic signals on controlled pedestrian crossings in the ongoing development and upgrade of infrastructure on East Wall Road, in North Dublin. Using RETENTION SYSTEM™ sockets in the foundation and installation of traffic signals ensures a quick and reliable maintenance programme. With RS115 sockets, any damaged posts in this highly-trafficked area are easily replaced without excavation and with minimum disruption to the public.

Further information on the RETENTION SYSTEM sockets for post installation is available at [www.retention-system.com](http://www.retention-system.com). Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © July 2013.
