

Case Study

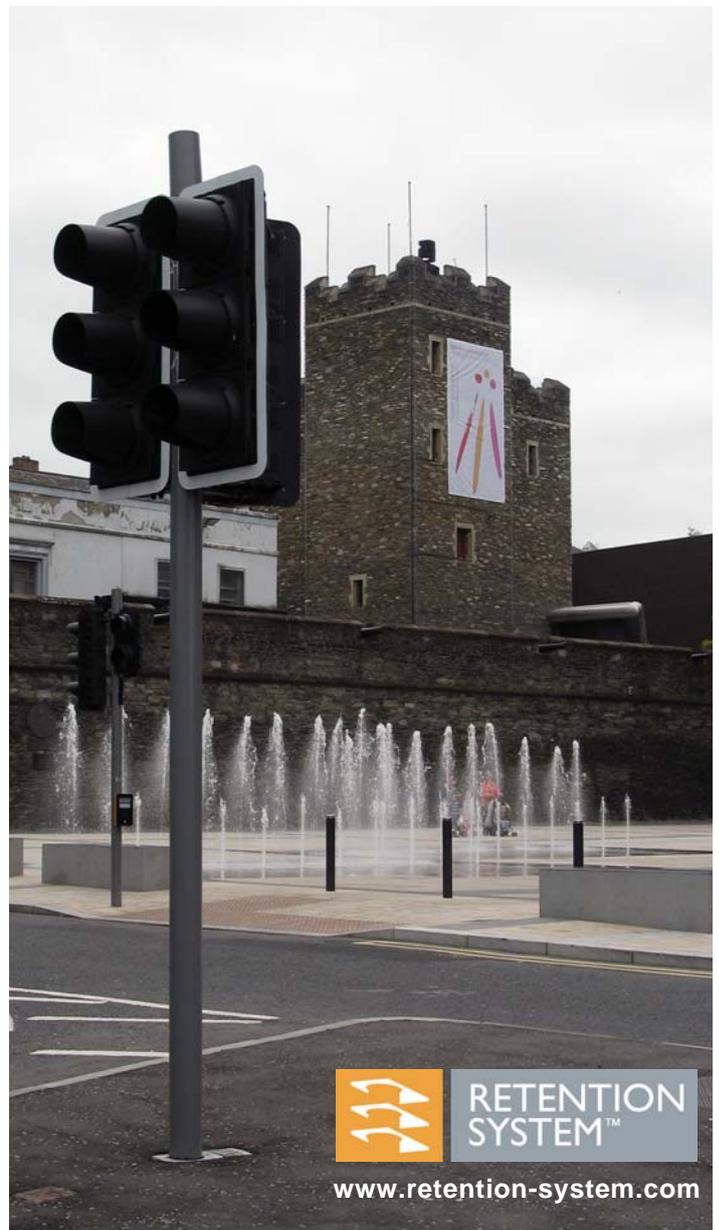

RS115 | Guildhall Square

Project: Traffic Signals, Guildhall Square, Derry, N. Ireland

Product: RS115df sockets

RS115 | Guildhall Square...

The Guildhall is one of Derry's most recognisable landmarks and has been at the heart of city life since 1890. Restoration of the hall was completed in 2013 and during the re-development of Derry's main civic areas and tourist amenities, RS115 sockets were used for the installation of traffic signals. RETENTION SYSTEM™ foundations bring improved infrastructure management, sustainable city design and low-cost maintenance. In Derry, this means damaged traffic signal posts can be quickly replaced without excavation ensuring minimum road works and traffic disruption in the city centre and historic regions.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission.
