

Case Study

RS115 | Los Angeles

Project: Information Signs, Los Angeles, California, USA
Product: RS115 sockets

RS115 | Los Angeles...

In 2003 Los Angeles commissioned information signs for places of historic and cultural interest, including City Hall and Union Station. The information signs were installed throughout LA in RS115 sockets for future easy removal and maintenance. At the time of installation using RS115 sockets allowed the designer and contractor to complete all foundation ground works prior to installing the signs in location.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © July 2009.
