

Case Study

RS168 | North Wall Quay

Project: Cantilever Traffic Signals, North Wall Quay, Dublin, Ireland

Product: RS168df sockets

RS168 | North Wall Quay...

RS168 sockets were incorporated in the foundation design and installation of 6m high cantilever traffic signals along North Wall Quay in Dublin. Foundation and ground works were first completed and all RS168 sockets sealed for safe pavement use along this busy commuter route. The installation and electrical connection of the traffic signal posts were then carried out at a later date.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission.
