

Case Study

RS48 | Wrocław

Project: Bicycle Stands, Wrocław, Dolnośląskie, Poland
Product: RS48 sockets

RS48 | Wrocław...

RS48 sockets were used for the installation of staple design Ø48mm galvanised steel bicycle stands in key locations throughout the city of Wrocław. The RS48 sockets were incorporated into the high-quality finish of the pavements and will facilitate future off-site maintenance — authorised removal and replacement — of the bicycle stands without the need for further excavation or ground works.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © January 2010.
