

Case Study

RS50x50 | Ellesmere Port

Project: Refuge Islands, Ellesmere Port, Cheshire, England

Product: RS50x50 sockets

RS50x50 | Ellesmere Port...

In Ellesmere Port, following an active pavement de-cluttering policy by the local authority, street furniture installation in required locations such as refuge island has been classed as high-risk of impact. Typically, pedestrian guardrail on refuge islands and busy junctions is regularly damaged by passing traffic but by using IPL group's RETENTION SYSTEM™ sockets, Cheshire Council successfully and economically manages these installations. All damaged items are replaced quickly and easily without further excavation or ground works reducing disruption and maintenance costs.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © June 2015.

RETENTION SYSTEM™

intelligent foundation for post installation
