

Case Study

RS76 | Słupsk

Project: Access Control Signs, Słupsk, Pomorskie, Poland

Product: RS76 sockets

RS76 | Słupsk...

In Słupsk, RS76 sockets have been used in the installation of Ø60mm access control signs for pedestrian areas. When required these signs can be un-locked by authorised personnel using the RS76 socket key and the signposts removed to allow vehicle access. The plug provided and stored within the RS76 socket is temporarily put in place to cover the hole and ensure a safe level finish for all road users.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission.
