

## Case Study

# RS mobile plinth | Buckingham Palace

**Project:** Traffic Management, Buckingham Palace and The Mall, London, England

**Product:** RS mobile plinths

## RS mobile plinth | Buckingham Palace...

RS mobile plinths were used by TfL (Transport for London) around Buckingham Palace and The Mall for the temporary installation of traffic signals during the renewal and upgrade of the traffic management network. The existing traffic signals were removed for four months during the construction works and RS mobile plinths provided temporary foundations to ensure normal traffic control and full pedestrian facilities. As required during state visits, parades and the London marathon, the RS mobile plinths were easily moved and stored off-site.

Further information on the RETENTION SYSTEM sockets for post installation is available at [www.retention-system.com](http://www.retention-system.com). Measurements and weights are approximate.
