

Case Study

RS mobile plinth | Dublin Airport

Project: Traffic Management, Terminal 2, Dublin Airport, Fingal, Ireland

Product: RS mobile plinths

RS mobile plinth | Dublin Airport...

Construction of the new second terminal at Dublin Airport required major road management and RS mobile plinths were used throughout for the temporary installation of traffic signals and signposts. The RS mobile plinths had cast-in RS115 sockets, lifting hooks for easy on-site mobility and provided safe concealment of electrical cables. The overall T2 project includes an improved internal roads network at Dublin Airport and uses RS115 sockets for post installations at critical locations.
