

Case Study

RS115 | Bridgwater

Project: Traffic Island, Bridgwater, Somerset, England
Product: RS115df sockets

RS115 | Bridgwater...

Dating back to 1249, the four-day Bridgwater Fair in Somerset attracts around 40,000 visitors each year with many tourists flocking to its quaint market stalls and fun rides. IPL group's RETENTION SYSTEM™ sockets are used at junctions and traffic islands along the route leading to the site of the fair. Guardrails, signs and traffic signals installed in IPL group's RS socket foundations can be easily removed to give access for wide-load vehicles on tight corners and to create more space for market stalls and crowd movement. When not in use RS sockets are fitted with the plugs provided and are flush to the ground for pedestrian safety. Once the fair is over, all the street furniture is easily reinstated without the need for repeat excavation.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © April 2019.
