

Case Study RS115 | Coventry

Project: Traffic Signals, Coventry, West Midlands, England
Product: RS115df sockets

RS115 | Coventry...

Coventry featured proudly as an Olympic co-host city during the London 2012 Games. During the upgrade of venue access roads, IPL group's RETENTION SYSTEM™ sockets were used for the installation of EN12767 passively safe traffic signal poles. These Sapa aluminium poles are designed with a Ø114mm root suitable for installation in RS115 sockets and combined promote sustainable design and safe work practices. With a view to asset management and future maintenance, the fully recyclable aluminium poles feature low level access doors for minimal work at height and the RS socket foundations ensure no further excavation is required during pole maintenance and replacement with the benefit of reduced costs, traffic management and crews on site.

passive safety...

IPL group is a leading manufacturer and supplier of passively safe roadside equipment.

As a signatory of the ERSC (European Road Safety Charter) we are committed to the development of infrastructure designed to minimise the risks of accidents and their severity.
