

Case Study

RS115 | Frederiksberg

Project: Seasonal Lighting, Frederiksberg, Copenhagen, Denmark
Product: RS115df sockets

RS115 | Frederiksberg...

IPL group's RETENTION SYSTEM™ foundation solutions simplify the installation of permanent and temporary street furniture and assist asset owners and operators across a range of management and maintenance jobs. Frederiksberg Kommune and Citelum manage and maintain the popular ice rink that is set up during the winter months at Frederiksberg Runddel in Copenhagen. IPL group's RS115 sockets were installed in 2018 for the additional seasonal lighting required for safe skating during short mid-winter days. When not in use the lighting poles are quickly and easily removed without the cost and disruption of excavation. The RS socket foundations remain flush to the ground and each socket is fitted with a plug to ensure pedestrian safety. This intelligent foundation solution means Frederiksberg Runddel is left clutter free and ready for the next event.
