

Case Study

RS115 | Swords

Project: RTI display signs, Swords, Dublin, Ireland
Product: RS115df sockets

RS115 | Swords...

All 5000 bus stops on the Dublin Bus network are included in the (RTI) Real Time Passenger Information system developed by Dublin Bus on behalf of the National Transport Authority of Ireland. Arrival times for buses at each stop are available on their website, by SMS text service, Smartphone Apps and on display signs. In Swords, IPL group's RETENTION SYSTEM™ sockets were used to install the display signs. The RS115 sockets ensured a clean finish for the high-quality stainless steel posts. RETENTION SYSTEM™ foundations also give the assurance that no further excavation is required during maintenance of the RTI sign posts thereby minimising potential passenger disruption.
