

Case Study

RS115 | Tullow Street

Project: X-Last flexible bollards, Tullow Street, Carlow, Ireland

Product: RS115 sockets

RS115 | Tullow Street...

X-Last flexible bollards were installed in RS115 sockets along Tullow Street in Carlow. Previous bollards on this narrow street were repeatedly damaged and in order to reduce the time, cost and disruption caused by constant maintenance of the street furniture, RS115 sockets were first installed so future bollards could be removed and replaced without further excavation. X-Last bollards were then installed in the RS sockets, these flexible polymer bollards are extremely durable, they are designed to bend under vehicle impact without damaging the bollard or vehicle and will return to their original shape.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate.
