

Case Study

RS115 | Wrocław

Project: Bicycle Stands, Wrocław, Dolnośląskie, Poland
Product: RS115 sockets

RS115 | Wrocław...

Wrocław is one of Poland's greenest cities with over 200 kilometres of cycling paths for residents and tourists to travel around. IPL group have been working with the city authorities on providing sustainable foundations for designated bicycle parking in front of many Wrocław venues. RETENTION SYSTEM™ socket foundations ensure the bike stands can be maintained easily, removed if necessary for special occasions and when damaged replaced without disruptive, costly and unsightly excavation.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © March 2012.
