

Case Study RS140 | Doncaster

Project: Passive Safe Signs, Doncaster, South Yorkshire, England
Product: RS140 sockets with RS base plate

RS140 | Doncaster...

Doncaster Metropolitan Borough Council installed Lattix Mast passive safe signs on the median of vital arterial roads as part of their focus on vehicle driver safety. The RS140 sockets with RS base plates used for this safe post installation further addressed safety concerns for maintenance crews working at busy high-risk locations. Robust RETENTION SYSTEM™ socket foundations minimises personnel, time and equipment required on site. Damaged posts can be maintained and replaced easily and quickly without any further excavation. Road works and traffic delays are significantly reduced.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate.
