

Case Study

RS50x50 | Bolton

Project: Refuge Islands, Bolton, Lancashire, England
Product: RS50x50 sockets

RS50x50 | Bolton...

Bolton Metropolitan Borough Council have employed a range of IPL group products in the construction of refuge islands throughout the town. RS140df sockets were used for the installation of wide based illuminated signposts and RS50x50 sockets used to install Weebol flexible bollards. Refuge islands are regularly damaged by passing traffic and the installation of all roadside fixtures in RS sockets allows damaged items to be replaced easily without further excavation or ground works thereby reducing disruption and maintenance costs.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com
