

Case Study

RS76 | Clifden

Project: Street Signs, Clifden, Connemara, County Galway, Ireland
Product: RS76 sockets

RS76 | Clifden...

IPL group's RETENTION SYSTEM™ is used throughout the picturesque town and popular tourist destination of Clifden on the Atlantic coast of Connemara, Ireland. RS76 sockets are used for the foundation and installation of street signs and seasonal street furniture and ensure all posts are easily maintained and damaged sign posts quickly replaced without disruptive and unsightly excavation or ground works. These sockets remain in position throughout the year and are finished flush with the ground. When not in use all RS sockets are securely plugged to ensure pedestrian safety.

Further information on the RETENTION SYSTEM sockets for post installation is available at www.retention-system.com. Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © November 2012.
