

# Case Study

## RS76 | Douglas

**Project:** Lifebuoys, Douglas, Isle of Man  
**Product:** RS76 sockets

### RS76 | Douglas...

IPL group has a long history of developing infrastructure solutions for difficult urban and rural areas including harsh maritime locations. Over the years we have worked closely with the authorities in the Isle of Man on the design and supply of bollards, railings and signposts to suit the island's coastal routes and renowned TT races. Street furniture, traffic signals and lighting columns have been installed and maintained in IPL group's RETENTION SYSTEM™ socket foundations and recently in Douglas, the pole-mounted red lifebuoys along the famous promenade and seafront have been upgraded and re-installed in RS76 sockets. This ensures that essential maintenance and future replacement of critical infrastructure can be carried out without repeat installation costs, excavation and disruption.

 **RETENTION SYSTEM™**
