

Case Study

RS76df | Płoty

Project: Traffic Island Signs, NR.109, Płoty, Zachodniopomorskie, Poland

Product: RS76df sockets

RS76df | Płoty...

Driver safety and maintenance issues surround the use of traffic-calming islands and speed-limit gateways on the road network. In Płoty, RS76 sockets have been used in the installation of passive safe Ø76mm illuminated directional signs on repeat knockdown locations. The RS socket has been designed for quick and easy replacement of damaged posts — without further excavation — minimising traffic disruption and maximising driver and worker safety.
