

# Case Study

## RS76df | Płoty

**Project:** Traffic Island Signs, NR.109, Płoty, Zachodniopomorskie, Poland

**Product:** RS76df sockets

### RS76df | Płoty...

Driver safety and maintenance issues surround the use of traffic-calming islands and speed-limit gateways on the road network. In Płoty, RS76 sockets have been used in the installation of passive safe Ø76mm illuminated directional signs on repeat knockdown locations. The RS socket has been designed for quick and easy replacement of damaged posts — without further excavation — minimising traffic disruption and maximising driver and worker safety.

Further information on the RETENTION SYSTEM sockets for post installation is available at [www.retention-system.com](http://www.retention-system.com). Measurements and weights are approximate. The designs are the property of Innovative Products Ltd (IPL group) and may not be reproduced without express permission. Innovative Products reserve the right to amend specifications or to withdraw models without prior notice. © December 2009.
