[Project Sheet:](#) | [CAD](#) | [Catalogue:](#) | [HD image](#)

Treatment pinewood against woodworm, termites and insects wood planks. Legs with a layer of epoxy primer and polyester paint corten colour powder coating.

Recommended anchoring: Floor mounting with Ø10 la fixation au sol, depending on the surface.

Note: "Wood is a living material. This aspect, which does not stop being the one that confers this so valuable natural character, also causes that it reacts to the changes of humidity in the form of appearance of cracks or small deformations. These changes do not affect the functionality, resistance or durability of the products at all."

The constant improvement and evolution of our products may cause some modifications in the technical specifications and characteristics of the same without prior notice.
