

Intelligent Solution RS QRE (Quick Release Extractor)

The RS QRE is a hand tool which has been designed to reduce the swelling at the point of impact on damaged posts and street furniture installations. This enables one person removal of all sheered or knocked down posts that have been installed in Retention System Sockets.

world leading design...

- Simplifies Civils installation
- Allows reuse of existing socket installations
- No extra special tools required
- Allows quick & simple removal of damaged posts

Sustainable Infrastructure Design

RS QRE

RS QRE (quick release extractor) allows the swift removal of a damaged pole by reducing swelling around the base

RETENTION SYSTEM QRE

quick release extractor for damaged poles
