Intelligent Foundation Solutions

RETENTION SYSTEM™ sockets are intelligent foundation solutions for the installation and maintenance of posts. Essential to sustainable infrastructure design, they add value through improved asset management and performance, reduced operational costs and deliver environmental, health and safety benefits.

world leading design...

- Patented design tested to international standards
- Approved and used throughout the world
- High-strength, reusable design survives vehicle impact
- Solution for knock-down and access-control locations
- Eliminates repeat excavation, disruption and expense
- Shallow foundation options for congested sites
- Easy to handle, adjust and install on site
- Facilitates electrical cabling at ground level
- Simplifies project, contractor & site management
- Assists maintenance and seasonal schedules
- Supports health and safety work practices
- Promotes environmental policies and targets

RS socket
installation & specification...

The RS socket should be set into concrete generally in accordance with International Standards or good Codes of Practice for the installation of posts.

1. Prepare hole at least 75mm deeper than the overall height of the RS socket.
2. Compact at least 75mm of MOT type 1 granular material in base of hole.
3. Position RS socket in centre of hole.
4. Rotate the RS socket head into the required orientation.
5. Remove locking lid and pedestrian plate.
6. Install a levelling post (stump pole) in the RS socket, fasten the locking set-screw and replace the locking chamber lid.
7. Surround with the required amount of concrete (ST4 mix or stronger). Use stump pole to achieve a vertical level.
8. Once vertical level is achieved, compact concrete.
9. Once concrete has been compacted and has begun to cure, carefully remove stump pole and replace the pedestrian cover.
10. Replace the locking lid and secure in position. Finish footway with required surface when concrete has cured.

See RS socket installation guide for foundation guidelines
For detailed foundation sizing on specific site conditions contact your supplier.
